

AXO BLOCK

25% Aluminum Chloride Hemostatic Gel

Product Description :

Axo Block is a 25% Aluminum Chloride Gel intended to be used to restrict and stop bleeding and control fluids in the sulcus surrounding the tooth during dental procedure in the mouth

Composition :

Aluminum Chloride, Glycerine, Fumed Silica, Methylene Blue Indicator, Spearmint Oil, Purified Water

Indications :

Restrict and stop bleeding during restorative procedures, Crown preparations & oral prophylaxis

Direction for use :

Remove the cap from syringe and fix applicator tip. Apply a sufficient amount of gel directly into the sulcus, carefully following the contour of the prepared tooth. Leave in place for 2 minutes. In case bleeding persists, wash off the gel and re-apply and wait for 2 minutes. Rinse gently, dry and take the impression. For Sulcus retraction, the gel impregnated retraction cord should be carefully placed stepwise in the gingival sulcus with the help of a cord.

Storage Conditions :

Store at temperature between 10°C to 24°C. Close the cap carefully after use. Keep away from moisture. Shelf life not affected after opening if stored in a cool dry place.

Shelf Life :

3 Years from the date of manufacturing.

Presentation :

1 x 3g Syringe, 3 x Applicator Tips

Disposal conditions :

To be disposed off based on the prevailing rules of the country in which it is used.
